ACADEMIC BACKGROUND

Ph.D. in Computer Science & Distributed Systems
Oxford University | 2018 - 2022

RESEARCH & SOFTWARE PROJECTS

Quantum Circuit Simulator (Python, C++, NumPy)

- High-performance state-vector emulator supporting up to 34 qubits with OpenMP acceleration.

Neural Graph Network | PyTorch, Python, Docker

- Deep learning framework for molecular property prediction on bio-chemical datasets.

Distributed Matrix Engine | Go, gRPC, Redis

- Fault-tolerant distributed linear algebra computational cluster.

CORE COMPETENCIES

Python, Go, C++, PyTorch, Docker, Kubernetes, Linux, Git, Distributed Systems
